

Targer Engineering & Consulting is a project and consulting company founded as a result of need for increase in industrial activities in Bosnia & Herzegovina and the region as the base generator of the region's economic growth. Our mission includes involvement for generating new industrial capacities as well as using the present ones in an optimal way.

Targer E&C supports its clients in an industrial environment through consulting, project management, engineering, human resources as well as educational services. All mentioned activities are conceived as reliable, flexible and dynamic additions to the client's processes.

WE LEAD YOU TO THE POINT WHERE SUCCESS BEGINS.

PERFORMING IN VARIOUS INDUSTRIES...

Our wide competence cover many industry sectors which are introduced with systems and methods resulting by stable and continuous processes. On the other hand, in activities related to specialized fields in particular branches, our team and a wide network of external partners guarantee the required level of specialization according to the highest standards of quality and to the smallest details, if that is necessary.

Our services are related to the following industry branches:

- Automotive industry
- Machinery, equipment and tools
- Textile, leather, clothing and footwear
- Furniture and wood
- Energy industry and environment
- Information technology (IT) and electronics
- Public administration and non-governmental organizations (NGOs)

SUPPORTING CREATION OF ADDED VALUES – OUR SERVICES!

Driven only by goal achievements we provide the best value to clients through high qualified experts as well as our network of external associates and partner organisations.

PROJECT MANAGEMENT

Targer Engineering & Consulting underlines project management in industrial environment as its special strength with a comprehensive approach which clearly provides a proper added value to clients. Clients are supported through project consulting, planning and realisation. We develop appropriate partnership models according to specific demands. The most comprehensive model we offer and conduct is a total project management approach whereby a complete project is managed with an option of issuing a performance guarantee.

In the scope of project management we support the following activities:

- Resource allocation strategy planning
- Planning of business projects
- Complete investment realization
- Company and production establishments
- Company and production transfers
- Expansion, reduction and optimizing of productions and operations
- Company or plant integration into a group system
- New product introduction

INDUSTRIAL ENGINEERING

By implementing organisational methods as Lean, JIT, Kaizen, Kanban, Pull, One piece flow, etc., in a specifically demanded occasion, we avoid needless resource and focus wasting so every client gets appropriate measures which are in the spirit of culture, time, space and organisational size.

Introduction of process excellence can be initiated by a decree, but it is only achievable through planning, hard and systematic work on change implementations whereby Targer E&C consults and trains organisations which chose to tackle that business breakthrough.

We offer services in the following fields of industrial engineering:

- Mapping, design and (re)organization of processes and production operations
- Optimization of processes and production operations
- Studies, norming of operations and ergonomics
- Problem solving methods: Six Sigma, 8D, FMEA
- Quality management and standards ISO 9001, ISO TS 16949, ISO 17025
- Logistics and stock management
- Production digitalization
- Maintenance and assembly
- Lean production and operational excellence

BUSINESS CONSULTING

It is especially important to foreign companies which are interested in operating in Bosnia & Herzegovina and the region to have a strong partner. Our support in that way include writing plans and strategies, audit advices, local development consulting, project realization or short term company management.

The following fields are covered by our services:

- Strategic business planning
- Low cost business planning
- Organisational design and settings
- Supplier sourcing and development
- Supply chain management
- Controlling and KPI introduction
- Mapping, ERP and IT system introduction
- Transitional and crisis management
- Risk management
- Business excellence and Lean mgmt

TECHNICAL SOLUTIONS
